

Home Health Aide (Trained Bedside Attendant)

A Home Health Aide is a trained bedside attendant, who assists elderly or bedbound clients in performing their daily activities.

We provide round-the-clock support, helping the patient with personal care, feeding, toilet needs, etc. We also monitor their general health by regularly measuring essential vitals like heart rate and blood pressure.

Diagnostics

Samples of lab tests for prescribed diagnostics or regular health checkup will be taken in the comfort of your home.

We offer a wide range of lab tests including Blood Urea Nitrogen (BUN), Complete Blood Count, Fast Blood Sugar (FBS), Postprandial Blood Sugar (PPBS), Lipid Profile, Serum Creatinine, Uric Acid and more. We also provide complete body health checkup packages.

Delivery of Medicines

We deliver medicines at your home and also help you with regular refills. Our services are available round-the-clock, are easily accessible and very convenient.

We help you with tracking refills of drugs, with prescribed brands and genuine drugs, while maintaining the cold chain storage.

Chronic patients suffering from kidney diseases, cancer, thyroid disorders and diabetes, who are on continuous medications will benefit by a regular supply of medicines.

Medical Equipment

Chronically ill patients need the support of medical equipment. You can rent or buy medical equipment from us on a regular basis at very reasonable costs.

Equipment commonly used

- Oxygen Concentrator
- CPAP/BIPAP Machines
- ICU Cot
- Bedsores Prevention Mattress and more...

CARE at HOME

CARE at HOME is a trusted home healthcare service provider with a difference. CARE at HOME is an extension of the care provided to patients in hospitals; the specialists and doctors consider the patient's house as an additional ward at home, wherein the responsibility of the patient's care continues to be entrusted with them. The core purpose is to deliver "Hospital like care in the comfort of one's home".

CARE at HOME is backed by the clinical excellence and proven track record of the CARE Group of Hospitals – pioneers in healthcare delivery, with a vast experience of over two decades. The CARE at HOME team is trained, guided and supported by highly reputed clinicians and allied healthcare providers.

Salient Features

- Complete hospital ecosystem of care in home comfort ensured through home visits by specialists, family doctors, nurses and customized technology
- Geographic and economic accessibility; transparency in all transactions
- Patient centric care delivered by highly trained and empathetic service providers
- Robust protocol-based treatment modalities to ensure standardized care

Specialist at Home

To ensure a continuum of care, we provide the services of specialists, who review the patient's health status, prescribe medication, suggest lifestyle changes, offer health education and closely monitor their health and wellness on an ongoing basis.

Consultations offered

- Cardiologist
- Diabetologist
- Nephrologist
- Neurologist
- and more...

Family Doctor

Our family doctor visits the patient at home to review the health status, recommend diagnostics, formulate a treatment plan and refer them to a specialist, if required.

The family doctor can suggest if a particular treatment is suitable to be given at home. They may refer the patient for home treatment, whilst keeping them under supervision at all times.

ICU at Home

Our ICU at Home services are driven by a critical care team comprising an Intensivist, ICU Nurses, Respiratory Therapist, Physiotherapist and more. They are extremely competent in handling chronically ill patients who need continuous close monitoring and nursing care using high-end medical equipment.

Our team is highly competent to handle a range of services that require clinical expertise, such as specially nursing care of patients who require invasive ventilator support, BIPAP/CPAP support, tracheostomy care, post-surgical care, stroke care, end of life care and more.

Step Down Nursing

Our nurses are licensed healthcare professionals, who provide nursing care to patients as per the doctor's prescription and their clinical condition.

Services Offered

- Monitoring of Vital Signs
- Administration of Injections
- Cannula Insertion
- Surgical Dressing
- Removal of Sutures/Clip Removal
- Urinary Catheter Insertion and more...

Physical Therapy

Physical Therapists are licensed healthcare professionals who can help reduce the patient's pain and improve or restore mobility through physical means.

Our Physical Therapist assesses, diagnoses and formulates a customized treatment plan based on the condition of the patient.

Services Offered

- Orthopedic Conditions
- Cardiac Conditions
- Post-operative Conditions
- Neurological Conditions
- Sports Conditions
- and more...
